PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of professional experience building scalable web and mobile applications using React.js, Next.js, React Native, NestJS, Node.js, and Python. Skilled in designing secure REST APIs and GraphQL endpoints, integrating cloud storage and automation workflows, optimizing SQL databases, and implementing caching strategies for high-performance, enterprise-grade applications. Experienced across the full software development lifecycle, from API design and database architecture to deployment and system monitoring.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, PHP, SQL

Frontend: React.js, Next.js, HTML5, CSS3, Responsive Web Design

Backend: NestJS, Node.js, Django, Flask, Laravel, Microservices Architecture

Mobile: React Native, Flutter

Databases: MySQL, Redis, SQLite, Database Design & Optimization

ORM: Prisma ORM, TypeORM

APIs & Integration: REST APIs, GraphQL, JWT Authentication, RBAC, Webhooks, Third-Party API Integration

Cloud & DevOps: Azure Blob Storage, Cloud Deployment, Git, GitHub, CI/CD Fundamentals

Real-Time & Messaging: Socket.IO, WebSockets, Pub/Sub Architecture

Practices: Agile/Scrum, Software Development Life Cycle (SDLC), Full Stack Development, Enterprise Application Development

PROFESSIONAL EXPERIENCE

Software Developer

Xsilica Software Solutions Pvt. Ltd.

May 2025 - Present

Hyderabad, India

- Engineered and optimized scalable web and mobile platforms using **React.js**, **Next.js**, **React Native**, and **NestJS**, which reduced client-side page load times by 35%.
- Designed and implemented secure **REST APIs** and **GraphQL** endpoints with **JWT** and **RBAC** utilizing **NestJS** and **Prisma ORM**, decreasing database query delays by 40% through **Redis** caching.
- Collaborated in **Agile** sprints using **Git** and **GitHub** to deliver core modules and automation-driven backend services for enterprise **IT Service Management (ITSM)** and workstation activity monitoring platforms.

PROJECTS

IT Service Management (ITSM) Enterprise System | *Next.js, React Native, NestJS, GraphQL, TypeScript, Prisma ORM, Azure Blob Storage*

- Delivered a cross-platform enterprise IT service request platform featuring a responsive **Next.js** web application and a **React Native** mobile client powered by a unified backend.
- Developed high-performance **GraphQL** endpoints on **NestJS** using **Prisma ORM**, reducing search latency by 30% via optimized database filters and cursor-based pagination.
- Integrated protected attachment uploads and document scanning workflows with **Azure Blob Storage** for efficient compliance auditing and enterprise-grade automation.

Elite Cafe – Full-Stack Restaurant & Delivery Ecosystem | *React.js, Next.js, React Native, NestJS, MySQL, Socket.IO, Redis*

- Architected a multi-branch restaurant and delivery ecosystem consisting of a **React.js** admin dashboard, a **React Native** customer application, and a unified **NestJS** API backend.
- Configured real-time order tracking and dispatch workflows utilizing **WebSockets** (Socket.IO) and **Redis** pub/sub architectures.
- Devised location-aware routing logic and automation rules to dynamically direct customer orders to the nearest kitchen branch based on coordinate calculations.

PayG Transaction Reconciliation Portal | *Python, Django, Pandas, NumPy, MySQL, HTML5, CSS3, JavaScript*

- Built a high-speed transaction reconciliation and data automation pipeline using Python **BytesIO** and vectorized **Pandas** and **NumPy** operations to process thousands of database records in sub-second times.
- Resolved duplicate Retrieval Reference Numbers (RRNs) and prevented Cartesian join errors by implementing custom sequence indexing.
- Launched an interactive web dashboard in **Django** featuring real-time status filtering (Matched, Unmatched, and Partially Matched) and filter-aware, automated report exporters.

Enterprise System Monitor & Activity Tracker | *React.js, Flask, Python, JavaScript, REST APIs, SQLite*

- Deployed an agent-based workstation monitoring system to track, audit, and log corporate workstation activities.
- Crafted an interactive dashboard using **React.js** and **Flask** to visualize CPU/memory telemetry, active processes, and daily audit reports.
- Implemented low-footprint background tracking agents with automated screenshot capture, keeping background CPU load under 1.5%.

CERTIFICATIONS

- **Python Full Stack Development** – VCube Software Solutions: Completed intensive training specializing in Python, Django, REST APIs, SQL, HTML5, CSS3, and JavaScript to build secure, database-driven web applications.

EDUCATION

Velagapudi Ramakrishna Siddhartha Engineering College <i>Bachelor of Technology in Mechanical Engineering (CGPA: 7.34)</i>	2021 - 2024 <i>Vijayawada, India</i>
Dhanekula Institute of Engineering & Technology <i>Diploma in Mechanical Engineering (CGPA: 8.09)</i>	2018 - 2021 <i>Vijayawada, India</i>
